

## MS43100

Kernwoorden: Openboek tentamen, tijdsbeperking, Steekproefgewijs bellen, Integriteitsverklaring, Proctoring Zoom.

Organizing an open book exam with proctoring via zoom. At the beginning of the examination, an integrity statement is included that the student must sign. Identifying the student - Students can provide a photo/scan of their campus card a priori and provide a scan during the exam. Students will respond to the questions on an A4 paper. If possible, try to use only one A4 per question. Finalized the stipulated time for the question/s, the student will submit the answer by making a picture with their smartphones and send it to the invigilator. Or via Zoom-chat, in case of a digital document. When the invigilator receives all answers, then she/he will inform about the following question and the process starts again until all questions have been answered and the exam finalized. Students can only leave the room (break to the restroom) in the time-slot between questions. The possibility that students could "privately" chat with one another (e.g. to compare outcomes...). Prevent this option in Zoom - Disable private chats between exam-participants as shown in Figure 1. • You can ask students (randomly) for screenshots of their computer and send via email. After the exam has ended, as a representative sample, a number of students can be phoned with the question to explain one of their answers. In case of evident or suspected fraud, the exam committee will be informed.
