

Q4 ME44300

We are currently preparing our materials for ME44300, Q4, taking into account the recent Corona measures and the desire to deliver this course at high quality through online means.

The final grade is currently scheduled to be determined as 40% of the grade for a written report of a group project and 60% of the grade for a written exam.

We kindly ask your permission to change this into:

70% grade of written report of the project and 30% grade of defence of the project (with individual grades).

The written exam will then not be used as means of assessment this year.

This proposed assessment format is the same format that we used effectively for this course in the years from 2014/2015 until 2017/2018. As such, we have proper methods in place to ensure that the assessment is carried out adequately and in line with the course's learning objectives.
