

ME46070 – Can Ayas

Dit uitgestelde tentamen (nu op 29 april) was al eerder goedgekeurd door excie
Het wordt nu een ANS tentamen ipv het eerder aangekondigde LC tentamen.

=====

Dear Ewoud,

I had many requests from students not to use learning catalytics for my online exam (ME46070) scheduled for 29th of April . Students find it difficult to work with and have to pay for a license. In the light of the discussions with colleagues regarding other exams performed in our department, I have decided to give the exam using ANS digital platform. This was also done with the resit exam of ME46005 Physics & Measurements Technologies. The proctoring will be the same, i.e. students will be monitored with webcams and microphones via Webex. I just wanted to let you know about this.

Best Regards,
Can
