

Summary

TUB (Germany) Sep. 2005 - Dec. 2005
Research at Department of Mechanical Engineering and Transport Systems

DTU (Denmark) Jan. 2006
Lecture at Department of Manufacturing Engineering and Management

Research

In Technical University of Berlin

Research Theme: Design of connections which are supporting automated disassembly

Connection components for easy disassembly was designed with design methodology by G.Paul and W.Beiz

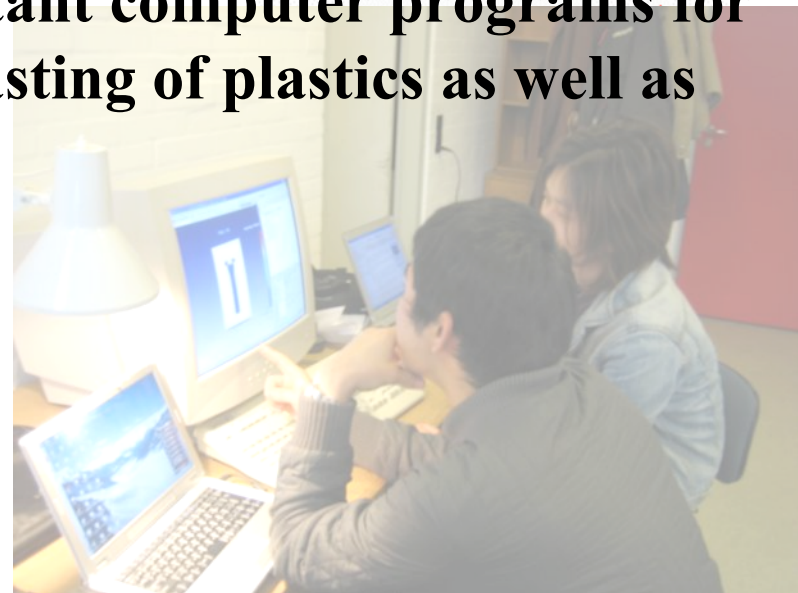

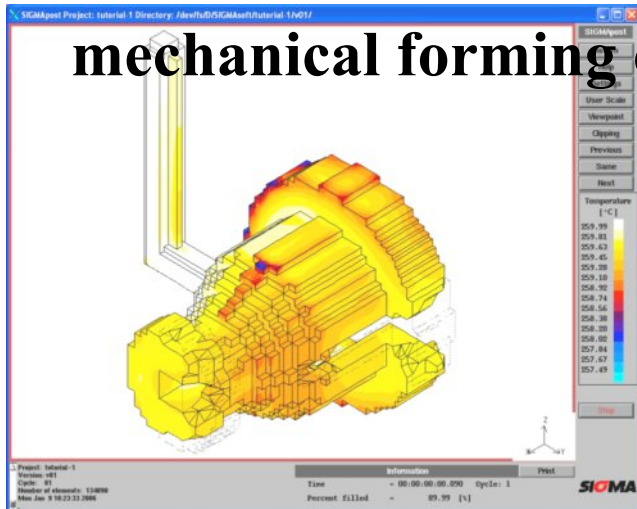

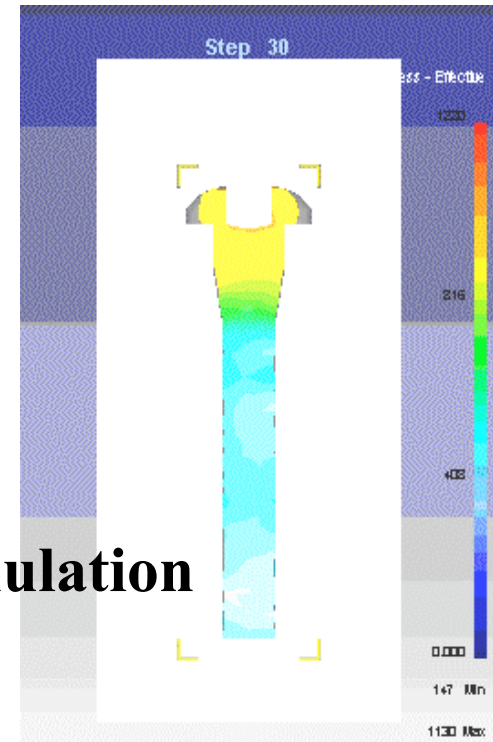

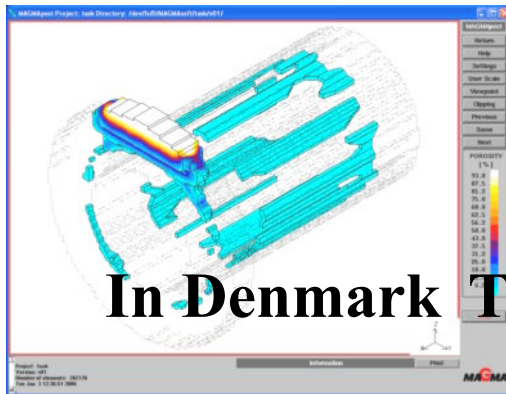

Lecture

In Denmark Technical University

Course: Laboratory course in Process Simulation

I learned some of the most important computer programs for simulation of metal casting, die casting of plastics as well as mechanical forming of metals.

Exchange Student Life

Culture, history, travel, party, friends and more.
