

Summary

A lot of surprise!

A lot of fun!!

A little bit accidents...

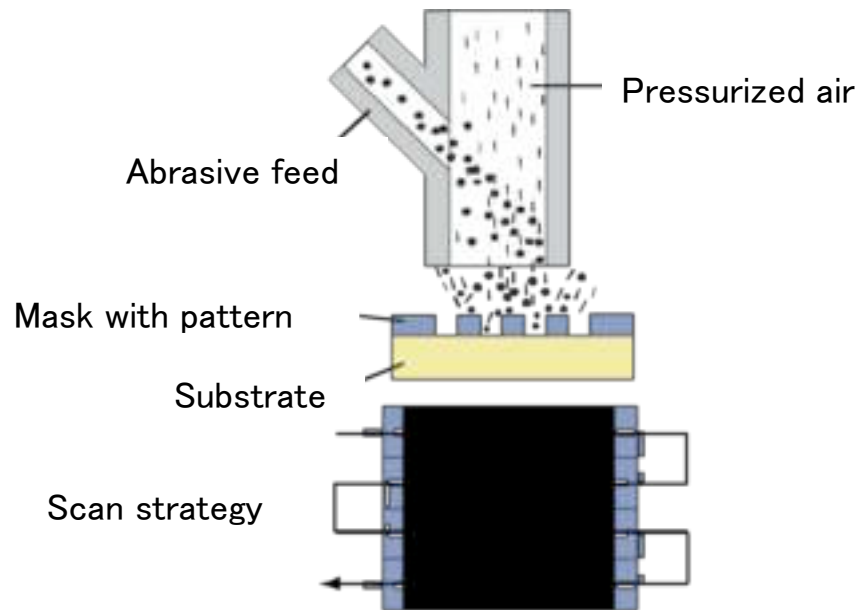

That's my precious experience

Osaka University
Kenshiro Hida

Research in Technical University of Delft

Research theme: Micro-Abrasive-Blasting

Micro-Abrasive-Blasting is a promising micro machining technique based on the erosion of a mask-protected substrate by a high-velocity particle jet.

Overview of MAB

Research view

3 week-lecture in Denmark Technical University

Lecture name: Project Course in Process Technology

In this lecture I conducted group work with foreign students

Lecture view

Exchange student life

I played with my friends after school!!
