

Summary

- Exchange year preparation
- Preparation seminar in Delft, The Netherlands
- Preliminary research and simulation
- New concept for forceps robot master
- Design and Manufacture of new concept
- Presentation and report preparation

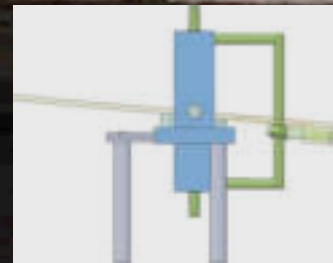

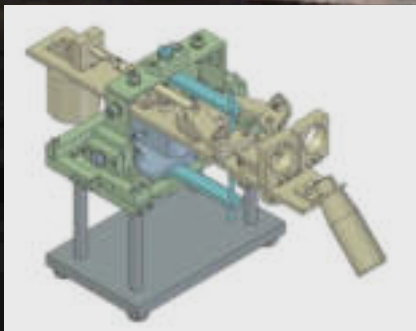

Research

- Preliminary research
 - Examining labmates' projects
 - Learning the programming language C++
 - Learning to use LaTeX
- Choice of topic
 - Redesign of Forceps robot master for control performance improvement

Research

- Procedure
 - Requirements for master
 - Energy and signal flow analysis
 - Working principles
 - New design proposal
 - Merits and demerits
 - Conclusion and future works

Exchange Student Life

- Daily life and sightseeing
- University life
- Life outside the university
- Home stay in Kagoshima
- Japanese language study
